➡️ Work Experience

Business Analyst | Ascension Technologies, Austin, TX

2013 – present

- Worked with clinical users to define and document functionality enhancements to improve process workflow and generate better communication around departments.
- Configured system software to meet business requirements. Including SQL code development and executing queries to evaluate and troubleshoot issues.
- Coordinated application implementation for new clinics and version releases for existing modalities for imaging departments.
- Utilized feature, incident, and service request tracking. Thoroughly document user functional design requirements and evaluated scope to recommend solutions.

Analyst I | Drilling Info, Austin, TX

2013 – present

- Developed and managed work breakdown structure for information technology projects.
- Assessed current and future customer needs and priorities by communication directly with clients.
- Developed implementation plans that included analyses for cust benefit or return on investment.
- **Quantify** your accomplishments, as much as possible (improved ... by 40%, reduced ... time by 50%, etc.).
